SUSTAINABILITY

CONCEPT

Product Overview

Mission

FoxGreen treats energy and efficiency as engineering constraints, not greenwashing slogans.

What it is

Sustainability-conscious computing notes: measurement caveats, workload placement, and honesty about what we cannot yet measure.

Core Capabilities

- Efficiency design prompts
- Measurement caveat templates
- Workload placement heuristics
- Anti-greenwash review checks

Use Cases

- Architecture efficiency reviews
- Hosting placement discussions

Technology

Architecture

Efficiency considerations attach to placement and scheduling decisions. Metrics require method notes.

Security Posture

Misstated environmental metrics are treated as integrity failures.

Open Research Question

How do we measure energy impact of continuous ranking and intelligence jobs without false precision?

Roadmap

Tie optional metrics into status once measurement methods exist.

Status: FoxGreen is labelled "concept" in the FoxHeight Continuum product registry. This label reflects verified implementation state, not a marketing claim. Source: SOURCE_DATA/products/foxgreen.json.
