

FoxHuman

Human systems and oversight

HUMAN

RESEARCH

Product Overview

Mission

FoxHuman centres people in automated systems: accessibility, oversight UX, and dignity in data collection.

What it is

HCI and human-machine collaboration patterns for products that otherwise optimise only for machines.

Core Capabilities

- Accessibility baselines
- Oversight UX patterns
- Consent-aware data practices
- Decision-support layout notes

Use Cases

- Accessibility reviews
- Approval UX tests
- Consent copy workshops

Technology

Architecture

Interfaces expose system state. Oversight workflows are designed with fatigue and error in mind.

Security Posture

Consent and minimisation apply to human data. Surveillance features are out of scope for this line's ethics.

Ecosystem & Roadmap

Declared Relations

- FoxHuman SUPPORTS foxai

Open Research Question

How do we measure decision quality when AI suggestions are present without creating automation bias studies we cannot run?

Roadmap

Bake FoxHuman checks into portal form and product UI reviews.

Status: FoxHuman is labelled "research" in the FoxHeight Continuum product registry. This label reflects verified implementation state, not a marketing claim. Source: SOURCE_DATA/products/foxhuman.json.
