

# FoxKnow

*Knowledge systems and graphs*

KNOWLEDGE

PROTOTYPE

---

## Product Overview

---

### Mission

FoxKnow models knowledge as entities and relationships that can be queried, visualised, and kept honest as facts change.

### What it is

Knowledge graph and retrieval line powering continuum maps and research indexing concepts.

### Core Capabilities

- Entity modelling patterns
- Relation catalogues
- Graph visualisation
- Research indexing hooks

### Use Cases

- Entity workshops
- Ecosystem graph maintenance
- Research linking

## Technology

---

### Architecture

Entities, typed relations, and visualisation surfaces. Stale edges are a hygiene problem, not a feature.

### Security Posture

Private knowledge sets require access control when introduced. Public graphs stay non-sensitive.

# Ecosystem & Roadmap

---

## Declared Relations

- foxinsight USES FoxKnow
- FoxKnow SUPPORTS continuum

## Open Research Question

*How do we detect and prune relation spam before graphs become untrustworthy?*

## Roadmap

Deeper API for knowledge queries with table fallbacks always available.

---

*Status: FoxKnow is labelled "prototype" in the FoxHeight Continuum product registry. This label reflects verified implementation state, not a marketing claim. Source: SOURCE\_DATA/products/foxknow.json.*
