

# FoxSpace

*Spatial and geosolutions*

SPATIAL

CONCEPT

---

## Product Overview

---

### Mission

FoxSpace examines spatial and geosolution problems where coordinate precision, privacy, and map layers matter.

### What it is

Concept/research line for spatial data layers and geo constraints — not a mapping SaaS claim.

### Core Capabilities

- Spatial modelling concepts
- Geo constraint notes
- Layer composition ideas
- Privacy-aware location handling

### Use Cases

- Geo layer prototypes
- Privacy reviews for location fields

## Technology

---

### Architecture

Spatial layers sit beside operational data with explicit precision and retention rules.

### Security Posture

Location data is sensitive by default. Retention limits are part of design, not an afterthought.

## Ecosystem & Roadmap

---

### Declared Relations

- FoxSpace RELATED TO foxlink

### Open Research Question

*What accuracy is “enough” for regional logistics without over-collecting personal movement?*

### Roadmap

Stay concept-labelled until concrete delivery engagements exist.

---

*Status: FoxSpace is labelled "concept" in the FoxHeight Continuum product registry. This label reflects verified implementation state, not a marketing claim. Source: SOURCE\_DATA/products/foxspace.json.*
